### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Cancellation of claims 1-9 are acknowledged.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 13, 2004 has been entered.

2. The Examiner acknowledges newly added claims 10-15 and cancelled claims 1-9. A request for continued examination withdraws the finality of the previous office action. Original claims 1-9 were directed towards a laminate. Newly added claims 10-14 are directed towards a process for making a laminate.

3. Since Applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. Applicant must file a divisional application or file a new application in order to prosecute the process for making a laminate.

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1774

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 15 is rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,733,651 to Wank et al.

Wank teaches a laminate comprising a colored layer. The laminate comprises films made from several different thermoplastic films. The laminate comprises a translucent polyurethane (PU) layer above a polycarbonate substrate or the PU layer can be the film itself (col. 9, lines 39-53) (functional equivalent to transparent PU layer). The colored layer is of a high-temperature resistant colored ink which is applied via screen printing. The PU layer is also applied to the colored layer via screen printing (col. 9, lines 39-43). See also col. 2, lines 39-50, col. 8, lines 50-68, and Examples 1-4. The PU has a thickness of 2-80 micrometers (0.020 – 0.080 mm) (col. 9, line 44), which overlaps the range of Applicant of “at least 0.025 mm”. To the softening temperature of 140 to 180C and Shore A hardness of 50 to 95, these are merely inherent properties because the same material and thickness is provided for by Wank. That the laminate is prepared by the process as recited in instant claim 10 is a product by process claim. Product-by-process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps. Patentability of an article depends on the article itself and not the method used to produce it (see MPEP 2113). Furthermore, the invention defined by a product-by-process invention is a product NOT a process. *In re Bridgeford*, 357 F. 2d 679. It is the patentability of the product claimed and NOT of the recited process steps which must be established. *In re Brown*, 459 F. 2d 531. Both Applicant’s and prior art reference’s product are the same.
